#### Link to the reference

https://apac.socomec.com/en/reference/ 35054026 SIDERMATs make and break under load conditions and provide safety isolation for any low voltage circuit.

The tripping function assures the following functions:

- protection of persons against insulation faults through combination with toroids and differential relays,

- protection against surges by working with CTs and thermal relays,
- fuse-based protection against short circuits.
