

# Maintenance contracts

for SUNSYS energy storage system

Operation

APPL 068 EPS

Energy storage is the core element for the transition of the electric utility system to Smart Grids.

The equipment availability is essential to optimise the massive integration of decentralised renewable energy, to reduce peak electricity consumption and to control the production-consumption storage balance.

Socomec service contracts are designed to keep your Smart Grid infrastructure operational and fully maintained to achieve the highest level of energy quality.

## Key points

- > Regular inspection
- > 24/7 Emergency service
- > Technical expertise on-site within 4h\*

*\* Please check the service coverage in your area.*

## Benefits

- > Improves system availability
- > Avoids grid congestion
- > Ensures energy balance profitability
